

# Qosium Scopemon

*Qosium Scopemon is a QoS/QoE monitoring tool. This sibling of Qosium Scope is designed for constant, always-on traffic monitoring instead of targeted measurements.*

## 1. Overview

Qosium Scopemon can be run virtually on any modern PC with a desktop environment. Scopemon is started simply by running the executable `QosiumScopemon.exe` without parameters. This will launch the [GUI](#), where the measurement can be monitored. Scopemon is configured by editing [the configuration file](#).
